OTT STREAMING DASHBOARD INSIGHTS

PRESENTED BY

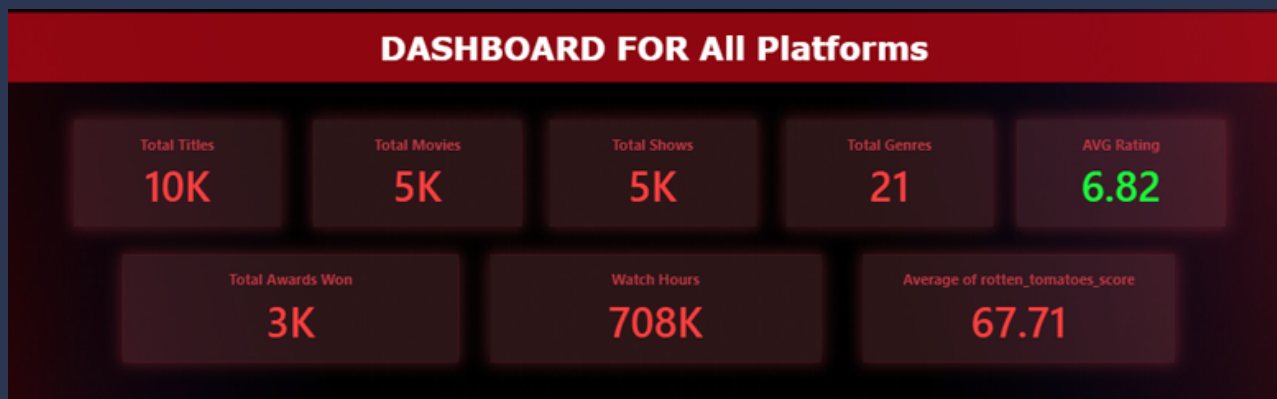

Sourav Singha

OBJECTIVE

Analyze OTT streaming platform content data to identify trends in content distribution, genres, ratings, release patterns, and geographic contribution.

Key KPIs

- Total Titles
- Total Movies
- Total TV Shows
- Average Rating
- Number of Countries
- Number of Genres

CONTENT DISTRIBUTION

Insight:

Movies constitute the majority of content available on the platform.

Business Impact:

The platform appears to prioritize movie content over long-form series.

RELEASE TREND ANALYSIS

Insight:

Content production increased significantly after 2015.

Business Impact:

OTT platforms have accelerated content acquisition and production in recent years to meet growing demand.

GENRE PERFORMANCE

Insight:

Drama, Comedy, and Action are the most frequently occurring genres.

Business Impact:

These genres attract broader audiences and should remain a focus area for content investments.

RATING ANALYSIS

Insight:

Most content falls within highly rated categories.

Business Impact:

Maintaining quality standards contributes to audience retention and platform credibility.

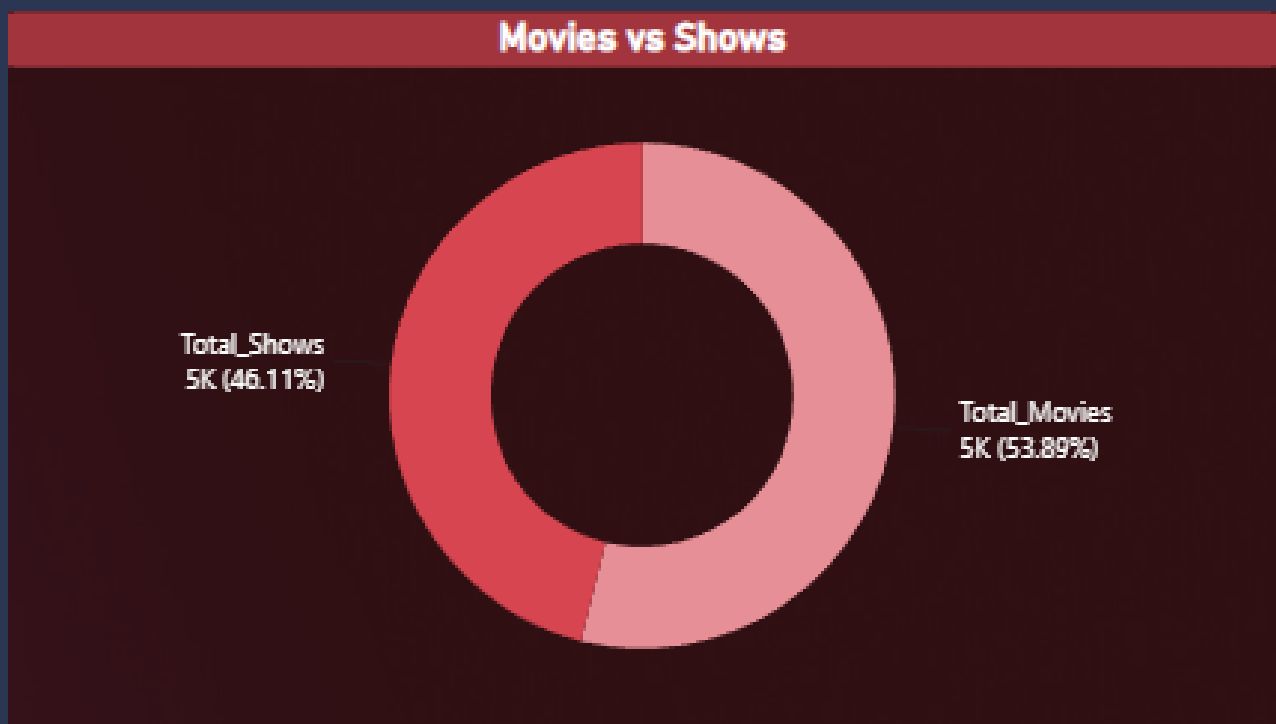

CONTENT DISTRIBUTION

Insight:

Movie content significantly outweighs TV Shows.

Business Impact:

Increasing original series production may improve user engagement and subscription retention.

RECOMMENDATIONS

Recommendation 1

Invest more in top-performing genres such as:

- Drama
- Comedy
- Action

Recommendation 2

Increase regional and localized content to attract diverse audiences.

Recommendation 3

Expand original TV series production to improve long-term viewer engagement.

Recommendation 4

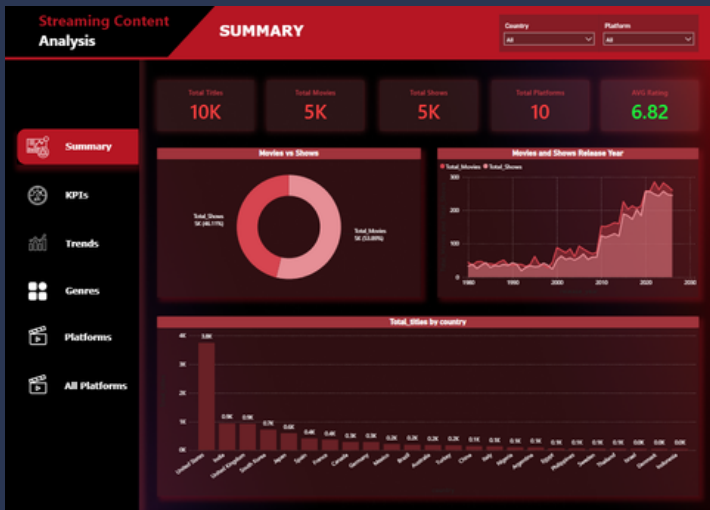

Continue investing in highly rated content categories.

CONCLUSION

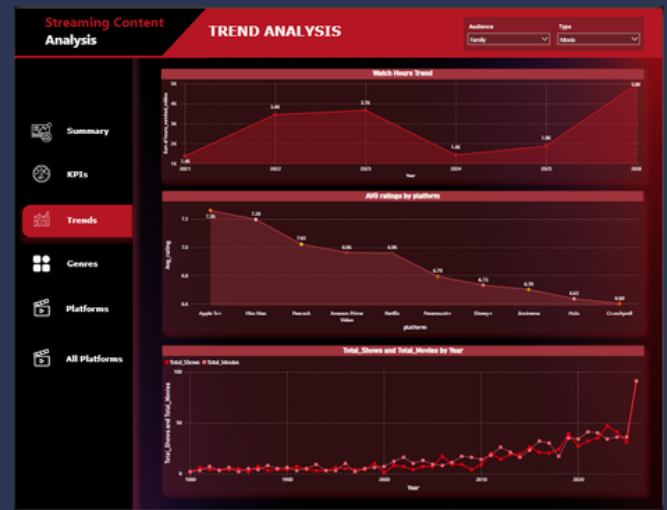

Summary:

The analysis reveals strong growth in OTT content production, dominance of movie content, and consistent popularity of Drama and Comedy genres. Strategic investments in regional content and original series can further improve platform engagement and subscriber retention.
